SAFETY DATA SHEETS

LymphoTrack[®] Assays – S5/PGM[™]

This document includes the Safety Data Sheets for reagents included in LymphoTrack Assays – S5/PGM, Catalog Numbers listed below.

Catalog Number	Description
71210007	LymphoTrack IGH FR1 Assay - S5/PGM
71210037	LymphoTrack <i>IGH</i> FR2 Assay - S5/PGM
71210047	LymphoTrack <i>IGH</i> FR3 Assay - S5/PGM
71210057	LymphoTrack <i>IGH</i> FR1/2/3 Assay - S5/PGM
71220007	LymphoTrack <i>IGK</i> Assay - S5/PGM
72270007	LymphoTrack <i>TRG</i> Assay - S5/PGM

Conforms to HCS 2021 – United States

SAFETY DATA SHEET

Section 1: Identification			
GHS product identifier : IGH Positive Control IGK Positive NGS Negative Control TRG POS (+) Control		Part number : 40880009 40880018 40920018 42270019	Other means of identification : IGH Positive Control IGK Positive NGS Negative Control TRG POS (+) Control
Product type		: Liquid	
Relevant identified issues of the substance or n	<u>ixture and</u>	uses advised against	
Identified uses For use as qualitative PCR cor	trols.		
Restrictions on use		: For profession	nal users only.
Supplier's details		San Diego, CA 92121 USA Tel: 185822 Toll Free: 18	Canyon Road, Building 1 4 6000 66 623 8105 nerservice@invivoscribe.com
Emergency telephone (with hours of operation)		: 1 866 623 8105 8 AM – 5 PM PST	
Section 2. Hazards Identificati	on

Section 3. Compositions/information on ingredients

:

Substance/mixture

Other means of identification

Mixture : Not available.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact	:	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove
		any contact lenses. Get medical attention if irritation occurs.
Inhalation	:	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
Skin contact	:	Flush contaminated skin with plenty of water. Get medical attention if symptoms occur.
Ingestion	:	Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Most important symp	otom	s/effects, acute and delayed
Potential acute	healt	h effects
Eye contact	t :	No known significant effects or critical hazards.
Inhalation	:	No known significant effects or critical hazards.
Skin contac	:t :	No known significant effects or critical hazards.
Ingestion	:	No known significant effects or critical hazards.
Over-exposure signs/	sym	<u>otoms</u>
Eye contac	t :	No known significant effects or critical hazards.
Inhalation	:	No known significant effects or critical hazards.
Skin contac	:t :	No known significant effects or critical hazards.
Ingestion	:	No known significant effects or critical hazards.
Indication of immedia	ate n	nedical attention and special treatment needed, if necessary
Notes to physici	an	: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatme	nts	: No specific treatment.
Protection of first	st aid	lers : No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media		
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.	
Unsuitable extinguishing media	: None known.	
Specific hazards arising from the chemical	: In a fire or if heated, a pressure increase will occur and the container may burst.	
Hazardous thermal decomposition products	: No specific data.	
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident there is a fire. No action shall be taken involving personal risk or without suitable training.	: if
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.	

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training.

Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

· · · ·	spilled material and runoff and contact with soil, waterways, drains, and sewers. In authorities if the product has caused environmental pollution (sewers, waterways
Methods and materials for containment and cleaning up	
Alternatively, or if water solub	e containers from spill area. Dilute with water and mop up if water soluble. le, absorb with an inert dry material and place in an appropriate waste disposal ensed waste disposal contractor.
confined areas. Wash spillage with non-combustible, absorb container for disposal accordir	e containers from spill area. Prevent entry into sewers, water courses, basements o s into an effluent treatment plant or proceed as follows. Contain and collect spillage ent material e.g. sand, earth, vermiculite or diatomaceous earth and place in ng to local regulations (see Section 13). Dispose of via a licensed waste disposal 1 for emergency contact information and Section 13 for waste disposal.
Section 7. Handling and storage	
Precautions for safe handling	
Protective measures	: Put on appropriate personal protective equipment (see Section 8)
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this materia is handled, stored and processed. Workers should wash hands and face befor eating, drinking and smoking. See also Section 8 for additional information or hygiene measures.
Conditions for safe storage, including any incompatibilities	: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.
	nal protection
Section 8. Exposure to controls/perso	

Individual protection measures

Hygiene measures

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Safety eyewear complying with an approved standard should be used when a risk assessment indicated this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. In contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Section 8. Exposure to controls/personal protection

Skin protection		
Hand protection	:	Chemical-resistant, impervious gloves complying with and approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Body protection	:	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	:	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	:	Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

Appearance		
Physical state	:	Liquid. [Clear.]
Color	:	Colorless.
Odor	:	Slight.
Odor threshold	:	Not available.
рН	:	Not available.
Melting/freezing point	:	Not available.
Initial boiling point and boiling range	:	Not available.
Flash point	:	Does not flash.
Evaporation rate	:	Not available.
Flammability (solid, gas)	:	Not available.
Lower and upper explosive (flammable) limits	:	Not available.
Vapor pressure	:	Not available.
Vapor density	:	Not available.
Relative density	:	Not available.
Solubility	:	Not available.
Solubility in water	:	Not available.
Partition coefficient: n-octanol/water	:	Not applicable.
Auto-ignition temperature	:	Not available.
Decomposition temperature	:	Not available.
Viscosity	:	Not available.
Flow time (ISO 2431)	:	Not available.

Section 10. Stability and reactivity

Reactivity : Chemical stability Possibility of hazardous reactions Conditions to avoid Incompatible materials Hazardous decomposition products	:	No dangerous reaction known under conditions of normal use. The product is stable. Under normal conditions of storage and use, hazardous reactions will not occur. No specific data. Reactive or incompatible with the following materials: oxidizing materials. Under normal conditions of storage and use, hazardous decomposition products should not
Hazardous decomposition products	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects		
Acute toxicity		
There is no data available.		
Irritation/Corrosion		
There is no data available.		
Sensitization		
There is no data available.		
Mutagenicity		
There is no data available.		
Carcinogenicity		
There is no data available.		
Reproductive toxicity		
There is no data available.		
Teratogenicity		
There is no data available.		
Specific Target organ toxicity (single exposure)	
There is no data available.		
Specific Target organ toxicity (repeated expos	ure)	
There is no data available.		
Aspiration hazard		
There is no data available.		
Information on the likely routes of exposure	:	Routes on entry anticipated: Oral, Dermal, Inhalation.
Potential acute health effects		
Eye contact		No known significant effects or critical hazards.
Inhalation	1	No known significant effects or critical hazards.
Skin contact	-	No known significant effects or critical hazards.
Ingestion	-	No known significant effects or critical hazards.
Symptoms related to the physical, chemical and	toxic	
Eye contact		No known significant effects or critical hazards.
Inhalation	1	No known significant effects or critical hazards.
Skin contact	1	No known significant effects or critical hazards.
Ingestion	1	No known significant effects or critical hazards.
	•	
Delayed and immediate effects and also chronic	: effec	ts from short and long term exposure
Short term exposure		
Potential immediate effects	:	No known significant effects or critical hazards.
Potential delayed effects	:	No known significant effects or critical hazards.
Long term exposure		
Potential immediate effects	:	No known significant effects or critical hazards.
Potential delayed effects	:	No known significant effects or critical hazards.
Potential chronic health effects		
General	:	No known significant effects or critical hazards.
Carcinogenicity	:	No known significant effects or critical hazards.
Mutagenicity	:	No known significant effects or critical hazards.
Reproductive toxicity	:	No known significant effects or critical hazards.
Numerical measures of toxicity		
Acute toxicity estimates		
There is no data available.		

Section 12. Ecological information

Toxicity		
There is no data available.		
Persistence and degradability		
There is no data available.		
Bioaccumulative potential		
There is no data available.		
Mobility in soil		
Soil/water partition coefficient (K _{oc})	:	Not available.
Other adverse effects	:	No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solution and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	IMDG	IATA
UN number	Not regulated.	Not regulated.	Not regulated.
UN proper shipping name	-	-	-
Transport hazard class(es)	-	-	-
Packing group	-	-	-
Environmental Hazards	No.	No.	No.

AERG : Not applicable

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transportation in bulk according to IMO instruments : Not available.

Section 15. Regulatory information

U.S. Federal regulations	: TSCA 8(a) CDR Exempt/Partial ex Clean Water Act (CWA) 311: Ed		
Clean Air Act Section 112	(b) Hazardous Air Pollutants (HAPs)	:	Listed
Clean Air Act Section 602	Class I Substances	:	Not listed
Clean Air Act Section 602	Class II Substances	:	Not listed
DEA List I Chemicals (Pred	cursor Chemicals)	:	Not listed
DEA List II Chemicals (Ess	ential Chemicals)	:	Not listed

Section 2. Hazards Identification

OSHA/HCS status	:	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910:1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.
Classification of the substance or mixture	:	Not classified.
GHS label elements		
Signal word	:	No signal word.
Hazard statements	:	No known significant effects or critical hazards.
Precautionary statements		
Prevention	:	Not applicable.
Response	:	Not applicable.
Storage	:	Not applicable.
Disposal	:	Not applicable.
Hazards not otherwise classified	:	None known.

Section 3. Compositions/information on ingredients

Substance/mixture :	Mixture	
Other means of identification :	Not available.	
Ingredient Name	%	CAS Number
Dimethyl Sulfoxide	≥1 - ≤3	67-68-5

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact :	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation :	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
Skin contact :	Flush contaminated skin with plenty of water. Get medical attention if symptoms occur.
Ingestion :	Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed

Potential acute health effects		
Eye contact	:	No known significant effects or critical hazards.
Inhalation	:	No known significant effects or critical hazards.
Skin contact	:	No known significant effects or critical hazards.
Ingestion	:	No known significant effects or critical hazards.
Over-exposure signs/symptoms	5	
Eye contact	:	No known significant effects or critical hazards.
Inhalation	:	No known significant effects or critical hazards.
Skin contact	:	No known significant effects or critical hazards.
Ingestion	:	No known significant effects or critical hazards.
Indication of immediate medica	al atte	ention and special treatment needed, if necessary
Notes to physician	:	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	:	No specific treatment.
Protection of first aiders	:	No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media		
Suitable extinguishing media	:	Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	:	None known.
Specific hazards arising from the chemical	:	In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous thermal decomposition products	:	Decomposition products may include the following materials: carbon dioxide carbon monoxide sulfur oxides

ection 5. Fire-fighting measures					
Special protective actions for fire-fighters	:	Promptly isolate the scene by removing all persons from the vicinity of the incident i there is a fire. No action shall be taken involving personal risk or without suitable training.			
Special protective equipment for fire-fighters	:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode			

Section 6. Accidental release measures

For non-emergence	cy personn	el :	No action shall be taken involving any personal risk or without suitable training.
			Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do no touch or walk through spilled material. Put on appropriate personal protective equipment.
For emergency res	sponders	:	If specialized clothing is required to deal with the spillage, take note of any information in Section on suitable and unsuitable materials. See also the information in "For non-emergency personnel"
Environmental pre	ecautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains, and sewers Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
hods and materials	for contai	nment and	d cleaning up
Small spill		Alternativ	if without risk. Move containers from spill area. Dilute with water and mop up if water soluble. vely, or if water soluble, absorb with an inert dry material and place in an appropriate waste disposa Dispose of via a licensed waste disposal contractor.
Large spill		basement and collec earth and	if without risk. Move containers from spill area. Prevent entry into sewers, water courses, ts or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain ct spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous I place in container for disposal according to local regulations (see Section 13). Dispose of via a waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for posal

Section 7. Handling and storage

cautions for safe handling	
Protective measures : Put on appropriate perso	onal protective equipment (see Section 8).
Advice on general occupational hygiene	 Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	 Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure to controls/personal protection

Control parameters

Occupational exposure limits

Ingredient Name	Exposure limits
Dimethyl sulfoxide	AIHA WEEL (United States, 7/2018). TWA: 250 ppm 8 hours

Section 8. Exposure to controls/personal protection

Appropriate engineering con Environmental exposure con	
Individual protection measur	<u>es</u>
Hygiene measures :	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location
Eye/face protection :	Safety eyewear complying with an approved standard should be used when a risk assessment indicated this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. In contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin protection	
Hand protection :	Chemical-resistant, impervious gloves complying with and approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Body protection :	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection :	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection :	Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

Ar	۱n	ea	ra	n	ce

ppearance		
Physical state	:	Liquid. [Clear.]
Color	:	Colorless, light yellow, light pink, light blue or light orange.
Odor	:	Odorless.
Odor threshold	:	Not available.
pH	:	7 to 9.5.
Melting/freezing point	:	Not available.
Initial boiling point and boiling range	:	Not available.
Flash point	:	Does not flash.
Evaporation rate	:	Not available.
Flammability (solid, gas)	:	Not available.
Lower and upper explosive (flammable) limits	:	Not available.
Vapor pressure	:	Not available.
Vapor density	:	Not available.
Relative density	:	Not available.
Solubility	:	Not available.
Solubility in water	:	Not available.
Partition coefficient: n-octanol/water	:	Not applicable.
Auto-ignition temperature	:	Not available.
Decomposition temperature	:	Not available.
Viscosity	:	Not available.
Flow time (ISO 2431)	:	Not available.

Section 10. Stability and reactivity

Reactivity :		No specific test data related to reactivity for this product or its ingredients.
Chemical stability	:	The product is stable.
Possibility of hazardous reactions	:	Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	:	No specific data.
Incompatible materials	:	Reactive or incompatible with the following materials: oxidizing materials.
Hazardous decomposition products	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

: No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solution and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information
